MEMORANDUM

Subject: Utah Lake

From: Donald Norseth

Attached is the monthly elevation and capacity of Utah Lake to December 1, 1975, as submitted by David B. Gardner, Utah Lake and Jordan River Commissioner. The lake on December 1, 1975, was at -0.39 feet below compromise. The Jordan River was flowing approximately 550 second-feet through the Turner Dam and discharged approximately 29,400 acre-feet during November.

As of the 22nd of this month, the lake elevation was at -0.11 feet, and the flow through Turner Dam has picked up to 650 second-feet. With all conditions being normal, it appears that we will reach compromise shortly after the first of the year.
